

## **POLYETHYLENE BAGS FIELD SECTION 2040**

**2040.1 Scope.** To establish procedures for inspection, acceptance, and reporting polyethylene bags for various uses.

### **2040.2 Procedure.**

**2040.2.1 Inspection.** Bags are to be randomly inspected at destination for visual and dimensional compliance prior to sampling.

**2040.2.2 Samples.** One bag of each size represented by the purchase order is to be submitted to the Central Laboratory. Bags are to be selected from random rolls/packages and at random locations therein. The first bag on a roll/package is not to be sampled. Identification Form T-617 is to accompany each sample and is to include all pertinent information, including field inspection results. If the sample fails to meet the requirements of the specifications, 2 additional bags, each from different rolls/packages and different locations therein, are to be submitted for testing. Both of the resamples must meet the specifications or the entire shipment will be rejected.

**2040.3 Report.** The laboratory will complete and issue the test reports.
